

REMARKS

Applicants respectfully request favorable reconsideration of this application, as amended.

In response to the objections to the drawings, Fig. 11 has been amended to add the reference number 140, and Fig. 3 has been amended to add the reference number 160. With the latter amendment, it becomes more readily apparent how Figs. 3 and 4 relate to the liquid crystal control driver 100 shown in Fig. 2. See write data latch circuit 160 in Fig. 2. The objection concerning the alleged lack of reference number 170 in Fig. 2 is not understood. Number 170 appears in Fig. 2 as originally filed and designates the write data timing generator circuit.

The specification has been revised to address the alleged informalities in the disclosure and the abstract.

Turning to the claims, in view of the indication of allowable subject matter in Claims 10 and 12, those claims have been rewritten in independent form and the remaining claims have been cancelled without prejudice or disclaimer. The Examiner's objections to Claims 10 and 12 have been addressed. The remaining claim objections, as well as the various claim rejections are moot in view of the cancellation of claims herein.

Accordingly, Applicants respectfully request that this application now be passed to issue.

The Commissioner is hereby authorized to charge to Deposit Account No. 50-1165 any fees under 37 C.F.R. §§ 1.16 and 1.17 that may be required by this paper and to credit any overpayment to that Account. If any extension of time is required in connection with the filing of this paper and has not been requested separately, such extension is hereby requested.

Respectfully submitted,

MWS:sjk
